May 2026 - Present

PROJECTS

TaskPilot : Workforce & Task Management Platform | Tech used : Next.js, TypeScript, Node.js, Express.js.

- Developed a full-stack workforce management platform supporting task assignment, attendance tracking, and team collaboration.
- Implemented Role-Based Access Control (RBAC) for Super Admin, Admin, Team, and Client users with dynamic dashboards and protected routes.
- Built a real-time notification system using Socket.io, enabling instant task updates, unread counters, live alerts, and in-app toast notifications.
- Designed a geolocation-based attendance system that records user coordinates, calculates office distance, and automates attendance validation.

RailXpress : Luggage Booking & Tracking System | Tech used : Java, Spring Boot, React, MySQL

- Designed and developed a full-stack luggage booking and tracking platform for railway passengers.
- Built RESTful APIs using Spring Boot following Controller-Service-Repository architecture.
- Implemented business logic for booking management, fee estimation, QR-based parcel identification, and tracking workflows.
- Integrated MySQL database for efficient storage and retrieval of booking and customer information.
- Developed email notification services using SMTP for automated booking confirmations and updates.
- Collaborated on frontend-backend integration using React and REST APIs to deliver a seamless user experience.

POSITION OF RESPONSIBILITY

- **Design Head** at FeedBox college clubs.
- **Event Coordinator** : Organized interactive session for UPSC aspirants by guest lecturer **Jatin Jain sir (AIR - 91)** and **Shrusti ma'am (AIR - 165)** : Motivational journey of UPSC Toppers from MP.
